

CMI Aeronautica, a company dedicated to the manufacture of machine tools, was born with the clear objective of offering a

Precision, Quality and Customer Service service in its market segment. Currently aware of the importance

to meet the expectations of the interested parties and to guarantee the Health and Safety of its personnel and of any

another person who may be in its facilities, has been provided with a Quality Management System, Environment,

and SST, in accordance with the requirements of the International Standards UNE-EN-ISO 9001, 14001, and 45001.

The General Management expressly expresses its commitment to promote the management of Quality, MA and OSH in CMI

Aeronautics, as well as minimizing the environmental impacts of its processes and products, for which it establishes the following

politics:

The ultimate objective of quality is the optimization of resources, with the lowest costs to obtain the performance

greater productive, based on the participation of all members of the organization to achieve the

stakeholder satisfaction.

Promote the use of the process approach and thinking based on risks and opportunities.

The management will promote the necessary improvements to obtain improvement objectives in all areas of the company.

management and in particular to minimize the effects of CMI activities on pollution and the health of the

staff.

Compliance with customer requirements and the guarantee of environmental management control, and SST is

consequence of both the controls, as well as a correct and exhaustive planning, execution and audit.

Commitment to comply with safety regulations and insist that they be complied with at all times by both

our employees as well as outside personnel in order to eliminate the dangers and reduce the risks as much as possible, as well

how to afford the necessary training and how many measures are adopted to improve the capacity and

competence of its workers and provide safe and healthy working conditions for the prevention of

damage and deterioration of health.

☑ Guarantee permanent compliance with the requirements, both legal and regulatory, and other commitments

relevant to the CMI context.

Management is subject to continuous improvement. Failures, both quality and environmental, and incidents

they must be used to learn and eliminate the causes that have generated them.

The integrated management of quality, environment and SST requires the collaboration and participation of all levels

and for this, consultation, information, communication and training are essential for decision-making in the

Management system.

All staff must accept the commitment to improve as much as possible within the field of their job.

The General Management, through the Training and Motivation Plan, ensures that its Policy is understood and accepted by

all the staff; and by performing internal audits verifies that the Management System implemented maintains

its efficiency and suitability.
